

YAHYA MOHAMED

Front End Developer

+201003573100 | Giza, Egypt | yahyamohamed742@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Front End Developer with proven experience delivering responsive, accessible, and performant web applications using React.js, Next.js, and TypeScript. Skilled at translating UI/UX designs into pixel-perfect, cross-browser-compatible interfaces with clean component architecture and efficient state management. Experienced integrating RESTful APIs, implementing i18n/RTL localization, and shipping production-ready features in fast-paced, collaborative environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL
Frameworks: React.js, Next.js, Tailwind CSS, Bootstrap
Libraries: XState, Axios, Framer Motion, Swiper.js, Material UI, Prime React
State Mgmt: Redux Toolkit, Zustand, Context API, React Query
Background: Node.js, Express.js, MongoDB, NextAuth
Tools: Git, GitHub, Visual Studio Code, Claude Code
Concepts: OOP, Design Patterns, REST APIs, i18n / RTL, RBAC, Front End Architecture

WORK EXPERIENCE

Front End Developer <i>TahaWorld · Full-Time · Hybrid</i>	Apr 2025 – Present
Front End Developer <i>Booking Desk Travel · Full-Time · Remote</i>	Mar 2025 – Apr 2025
Front End Developer <i>MH Marketing Agency · Full-Time · Remote</i>	Aug 2024 – Feb 2025
Front End Developer Intern <i>IT-Gate · Internship · Onsite</i>	Jun 2023 – Aug 2023

PROJECTS

MaxabHub — Unified E-Commerce Management Platform [\[Live Site\]](#) · [\[Screenshots\]](#)

Next.js · React · TypeScript · Tailwind CSS · Redux Toolkit · i18n

- Developed a scalable B2B e-commerce platform enabling merchants to centrally manage product sourcing and multichannel sales operations, connecting international suppliers (e.g., AliExpress) with local markets.
- Implemented smart product import system via URL, keyword search, and image search with AliExpress API integration — automating extraction of images, variants, pricing, and shipping data.
- Integrated AI-powered tools to auto-generate professional product titles, descriptions, and metadata in Arabic and English, improving product presentation and conversion rates.
- Connected the platform to Salla, Shopify, and Zed for centralized product synchronization and multi-store management.
- Built real-time dashboards displaying revenue, orders, supplier performance, and sales trends using dynamic visualizations.
- Developed a wallet and financial management system with transaction history, profit calculations, and per-product cost analysis.
- Implemented full bilingual support (Arabic / English) with RTL layout, tailored for MENA region users.
- Designed RBAC system with separate admin and merchant interfaces, customized permissions, workflows, and reporting.
- Built integrated support and ticketing system for managing requests, issue tracking, and resolution workflows.

Clara System — Corporate Services Quote & Proposal Platform [\[Screenshots\]](#)

Next.js 16 · React 19 · TypeScript · XState · Prisma · NextAuth · Tailwind CSS

- Built a full-stack web application for generating, managing, and exporting legal and corporate-services quotes covering company documents, equity changes, director appointments, data-protection filings, and ADGM/registry services.
- Architected a complex XState state machine driving a dynamic, conditional questionnaire that guides users through hundreds of branching service paths.
- Automated computation of line-items, government fees, and high-transaction surcharges from a centralized pricing map.
- Implemented authentication and role-based access using NextAuth and Prisma ORM connected to a relational database.

Gavex Market — Full-Stack Gaming E-Commerce Platform [\[Live Site\]](#)

Next.js 16 · TypeScript · Node.js · Express.js · MongoDB · Redux Toolkit · React Query · Tailwind CSS · Cloudinary · Claude Code

- Built a complete full-stack gaming e-commerce platform — Next.js customer storefront, React/Vite admin dashboard, and a Node.js/Express REST API deployed as three independent production apps on Vercel and Railway.
- Engineered a dual-path cart and checkout system: guests store cart in Redux/localStorage with automatic passwordless account creation and JWT issuance on order placement; authenticated users sync carts server-side to MongoDB with pre-filled address management.
- Implemented a full shopping lifecycle: product catalog with category filtering, coupon/discount engine, multi-method payment handling, and order status tracking (pending → confirmed → shipping → delivered).
- Built a feature-rich admin dashboard with Recharts analytics (revenue, orders, sales trends) and full CRUD management for products, users, coupons, categories, and service requests.
- Integrated Cloudinary CDN for image delivery and extended the platform with a customizable T-shirt ordering system and a gaming repair/service request workflow with image-based submissions.

Mtr App — Real Estate Platform (Saudi Arabia) [\[Live Site\]](#)

Next.js · Tailwind CSS · Zustand · Framer Motion · Swiper.js · React Leaflet · Axios

- Designed and developed a full-featured platform for buying and selling land in Saudi Arabia with interactive map integration using React Leaflet.
- Built dynamic property listing, feature-rich post browsing, and integrated payment processing for listing fees.
- Developed admin and user dashboards for site and account management with dynamic forms.

Arabtec Admin Panel [\[Live Site\]](#)

Next.js · Bootstrap · Framer Motion · Custom CSS

- Built a fully animated admin panel for Arabtec Company featuring dynamic sliders, smooth transitions, and comprehensive data visualization.

EDUCATION

B.Sc. Management Information Systems

2021 – 2025

Modern Academy, Maadi, Egypt

React & Next.js Professional Course

Aug 2024 – Sep 2024

Div Academy

LANGUAGES

Arabic (Native) **English** (B1 – Intermediate)
